

What is HTML?

- HTML stands for “Hyper Text Mark-up Language”.
- An HTML document contains the text of the web page itself, along with mark-up language about the text.
- HTML is only used for quite basic web page. Cascading Style Sheets are used for more complicated pages.

Page Outlook

- Web pages are just like humans, they have a body and a head.
- The head is the top bar across the page and the body is the actual page.
- Pages can be arranged by using tables.

Tags

- A web page is made up of tags. Example - `<center></center>`
- Every part has an opening tag and closing one. It closes with a / after < in the second part of the tag pair.
- Not all tags open and close. Example - `<div align=center>`

A web page

- Web pages are typed into notepad.
- Every web page file end in .htm or .html
- HTML documents start with <HTML> and end with</HTML>.

Starting your Web Page

- Open up a notepad document.
- Start by typing `<HTML>`
- Then go down a line and type `<HEAD>` followed by `<TITLE>`.
- Then type the title of your page.
- Close the title tag then close the head tag.

Your page

- Your page should look like this:
- `<HTML>`
- `<HEAD><TITLE>Your Title</TITLE></HEAD>`
- Next type `<BODY>`. This will be your page
- To put a coloured background `<BODY BGCOLOR="a colour">`
- To make coloured text type `<BODY TEXT="a colour">`
- Make the text colour go with the background.
- To make more complicated colours you can use a colour code.
- Save your page. It must be called `index.htm`

Web Page

- Next type `<center>` to centre your text.
- Then type `<H1>` to make your text big.
- Now type the title of your page and close the tags.
- You can use the `<I>` tag for Italics, `` for Bold `<U>` for underline and `<TT>` for typewriter.

The Page

- The page should look like-
- `<HTML>`
- `<HEAD><TITLE>Your Title</Title></HEAD>`
- `<BODY>`
- `<BODY BGCOLOR="a colour">`
- `<BODY TEXT="a colour">`
- `<CENTER><H1>Your Title</H1></CENTER>`

Closing

- To close your page end the body tag and lastly end the HTML tag.
- Now continue your page and change to your like here are some useful tags.

Your page

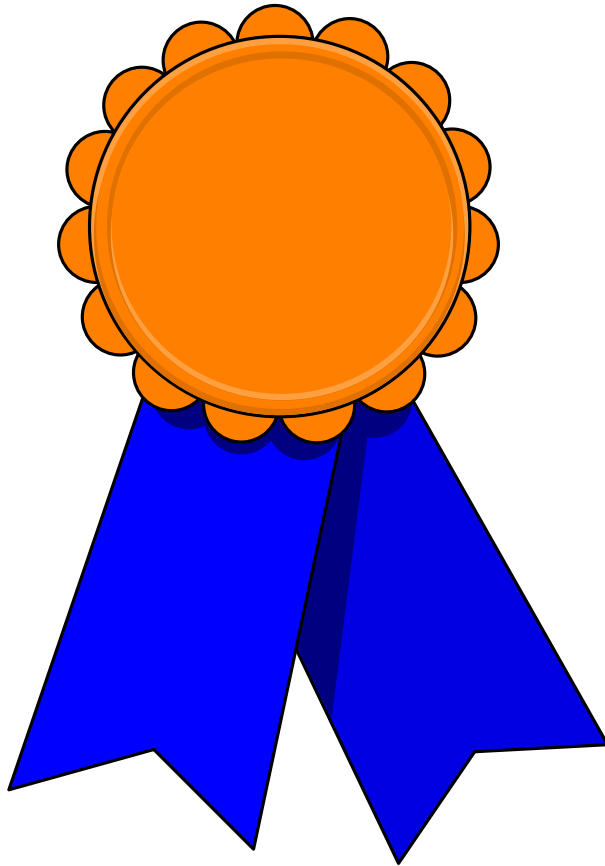

- To insert an email link type-
`Email me`
- To make a web link type-
`<A HREF="The Site". My Favourite Site`

Your Page

- To insert an image type-
- ``
- The positioning tags are `<div align=center>`
- `=left>`
- `=right>`
- To make a image background type-
- `<body background="image file">`

The End

- Now you are ready to create a award winning page.
- Later you will learn other computer languages.
- Next week Ashy is taking a lesson on advanced HTML, in 2 weeks there will be a graphic lesson and in 3 I will take a Java Script lesson.
- Thank you for coming.
